1. Introduction

PaperForge converts Markdown into a styled PDF using a headless browser. This file demonstrates the supported features: tables, code blocks, math formulas, blockquotes, and an ABNT-style references section.

The thermodynamic equilibrium relation is given by

$$\Delta G = \Delta H - T\Delta S$$

inline math also works: $E = mc^2$.

2. Methods

Sample	Mass (g)	Volume (mL)
A	1.20	5.0
B	0.85	4.2
C	1.05	4.8

```
def normalize(values):
    total = sum(values)
    return [v / total for v in values]
```

3. Results

A blockquote stands out the way a sidebar would.

The viability data showed a **35% improvement** in the treated condition.
